DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the engaging members engaging with each other about or around the user, does not reasonably provide enablement for the article to be engaged or attached to the user. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Lovison USPN 4022212. As to claim 1, Lovison discloses a panty element A and a sanitary napkin B, and first engaging member 31 on the front panel and second engaging member 31 on the rear panel (Figure 3), which can be engaged without engaging a user's legs through the panty element.

As to claims 2-4, each of the front and rear panels 13, 15 have a free edge to which the engaging members are attached (Figure 3).

As to claim 5, the engaging member comprise hook-and-loop engaging members (Figure 3).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ygge et al. USPN 5549593 and Lockhart USPN 5241710 are cited to show sanitary panties with panels having engaging members.
